Open Source

fastlane	fastlane.tools is the easiest way to automate building and releasing your iOS and Android app. Started as an open source project during college, I grew fastlane to be the number one deployment tool for mobile applications used by more than 500,000 apps. It got acquired by Twitter, and later Google.
howisFelix.today	A quantified self-dashboard, analysing over 400.000 data points about my life
danger	Co-started the open source project danger , a CI-tool to automate PR reviews
TSMessages	A library to show elegant in-app notifications in iOS apps
